The Better Law Construction of Justice in the Implementation of Restorative Justice <i>Oksidelfa Yanto, Dadang, Hasan Alzagladi, Guntarto Widodo, Nani Widya Sari</i>	331-340

We are pleased to present the inaugural edition of the International Journal of Law Analytics, a platform dedicated to advancing the intersection of law, technology, and data-driven insights. This journal emerges as a response to the growing need for comprehensive research and analysis in an era where legal systems worldwide are increasingly influenced by digital transformation and analytical methodologies.

The International Journal of Law Analytics aims to serve as a scholarly hub for legal practitioners, academics, policymakers, and technologists to explore the evolving dynamics of legal frameworks through data and technology. By fostering a multidisciplinary approach, the journal seeks to address complex legal challenges and provide innovative solutions informed by rigorous analytics.

This issue showcases an array of topics, including the application of artificial intelligence in legal decision-making, the role of big data in legal reform, privacy concerns in digital legal environments, and the ethical implications of predictive analytics in law enforcement. Each contribution reflects the journal's commitment to excellence, fostering dialogue across disciplines and geographies.

We extend our gratitude to the authors for their thought-provoking research, to the reviewers for their meticulous and constructive feedback, and to the editorial board for their unwavering dedication to maintaining the highest academic standards.

As the field of law analytics continues to evolve, we hope this journal serves as a catalyst for critical thinking and collaboration, inspiring innovative practices that shape the future of law and justice.

We invite readers to engage with the content, contribute their perspectives, and join us in exploring the transformative power of analytics in the legal domain.

Happy reading

Marisa Yunita, S.Pd., M.M
